

Project Initialization and Planning Phase

Date	13 august 2026
Team ID	
Project Name	India's Agricultural Crop Production
Maximum Marks	3 Marks

Scenario 1: Small-Scale Farmer

Rajesh is a small-scale farmer in Uttar Pradesh who wants to maximize his crop yield and income. However, he struggles to decide which crops to grow each season due to changing weather patterns and market demand. By analyzing historical agricultural data (1997–2021), Rajesh needs insights into seasonal crop trends, regional productivity, and high-performing crops to make better farming decisions and reduce risk.

Scenario 2: Government Policy Analyst

Ananya works with the Ministry of Agriculture and is responsible for designing policies to improve agricultural productivity across India. She needs to identify regions with low crop yield, understand long-term production trends, and evaluate the impact of seasonal variations. Using Tableau dashboards, she aims to uncover patterns in the data to support data-driven policy decisions and allocate resources effectively.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Beca use	Which makes me feel
PS-1	Small-Scale Farmer	I want to maximize my crop yield and income.	I Struggle to decide which crops to grow each season due to changing	I want to maximi ze my yield	I must analyze historical agricultural data (1997–2021), I needs insights into seasonal crop trends,

			weather patterns and market demand		regional productivity, and high-performing crops to make better farming decisions and reduce risk.
PS-2	Government Policy Analyst	I am designing policies to improve agricultural productivity across India	I need to identify regions with low crop yield, understand long-term production trends, and evaluate the impact of seasonal variations	I am working with the Ministry of Agriculture	By using Tableau dashboards, I am trying to uncover patterns in the data to support data-driven policy decisions and allocate resources effectively.
